WE are not printing the regular spring edition of our catalog, therefore, we hand you this list of novelties and special items for spring and summer, 1942. Kennedy Kwaliti will be strictly maintained.

FOR DESCRIPTIONS and cultural instructions see our 1941 spring edition. If you do not have a copy at hand we will gladly mail one.

THE GLADIOLUS AND DAHLIA LISTS have been completely revised to include new introductions and to reduce prices where last year's novelties are now available in quantity.

OUR REPRESENTATIVES are located within driving distance of the whole eastern seaboard. Please feel free to call on them to help solve your garden and lawn problems. Call or write to us and an interview will be arranged at your convenience.

SEED PRICES have advanced somewhat. But except for particular items for which an unusual demand will prevail during the emergency; or, in those cases where the customary sources of certain crops have dried up, the best selections of true strains are available. Order early, while stocks are complete.

Lawn Grass Seed Mixtures

For Permanent Lawns of Putting Green Texture

Kennedy's BENTURF Lawn Grass Seed Mixture (Bent Formula)

The popularity of golf in recent years has made comparison of lawns and putting greens an easy matter. One hardly expects his lawn to look as perfect as a putting green, but this is possible if sown with Kennedy's Benturf Lawn Grass Seed Mixture. With reasonable preparation and care, excellent results have been accomplished with our Kennedy's Benturf Lawn Grass Seed Mixture, which contains a large amount of Bent seed. This makes a compact, rapid growth, forming a close sward withstanding wear and tear. Lb., \$1.50; 5 lbs., \$7.00; 25 lbs., \$32.50; 100 lbs., \$125.00.

Kennedy's GREENTURF Lawn Grass Seed Mixture

This is the lawn grass seed mixture which for over 25 years has seeded many of the most beautiful lawns in America under the name of Kennedy's Green Velvet Lawn Grass Seed Mixture. Recently worthless mixtures bearing the trade name "Green Velvet" have been marketed to the confusion of our patrons. To avoid this confusion we have changed the name to Kennedy's Greenturf Lawn Grass Seed Mixture. The seed in this mixture is all re-cleaned and especially adapted to withstand the heat and drought of the summer. When properly sown and cared for, Greenturf will produce a beautiful green lawn the entire season. Lb., 80c; 5 lbs., \$3.75; bu., \$14.50; 100 lbs., \$70.00.

Kennedy's KWIKTURF Lawn Grass Seed Mixture

Where a quick turf is desired which will remain green with a minimum of care we recommend this mixture which is composed of deep rooting, strong growing grasses. Lb., 60c; bu., \$11.00; 100 lbs., \$50.00.

Kennedy's SHADETURF Lawn Grass Seed Mixture

This is a mixture of extra fine grasses adapted for growing in the shade and under trees. We recommend the use of this mixture wherever other grasses, on account of shade, have failed to make a close sward. Lb., 85c; 5 lbs., \$4.00; bu., \$16.00; 100 lbs., \$75.00.

Kennedy's KARPETURF Lawn Grass Seed Mixture

This mixture is comprised of some of the quick germinating grasses as well as larger proportions of the permanent, deep rooted varieties. It has been tried in a great many sections of the country and has given excellent results where a quick cover was desired and has proven particularly adaptable for sowing on old lawns which have become shoddy and in need of renovating. Lb., 65c; 5 lbs., \$3.00; bu., \$11.50; 100 lbs., \$55.00.

Kennedy's PUTTING GREEN Mixture

Made up of deep rooting permanent grasses with a view of forming a close turf which will stand being played on a great deal without showing any wear and tear. Bu., \$20.00; 100 lbs., \$95.00.

Kennedy's TENNIS COURT Mixture

The hardest and finest low-growing grasses are contained in this mixture. It produces a beautiful and lasting green turf calculated to withstand hard wear and tear. Bu., \$20.00; 100 lbs., \$95.00.

Kennedy's TERRACE Mixture

A mixture of strong, deep-rooted grasses for banks and terraces. Although the grasses are strong and deep-rooted, they will produce a fine, green velvety surface, and also prevent washing away during heavy rains. Lb., 95c; 5 lbs., \$4.00; bu., \$17.00; 100 lbs., \$80.00.

POMPON OR BOUQUET DAHLIAS

From year to year we have added new varieties to our list of Pompons until there is considerable duplication which only results in confusion when a selection of Poms is to be made.

Recent introductions have the following to recommend them over their predecessors:

A longer, wiry stem, sometimes reaching 24 inches. All the newer varieties are characterized by a reduction in the size of flower and a perfection of form and placement of petals. Lastly, the colors are truer and more distinct.

We suggest a careful consideration of the following list with the descriptions and advise your replacing some of the old ones with these new perfected types.

Kennedy Quality Exhibition Gladiolus

OUR GLADS ARE FREE FROM THRIP!

Due, no doubt, to scientific treatment of planting stock for years our Gladioli have always been free from thrip. As an added precaution and to be sure that bulbs supplied by us are absolutely free from this pest, we will also scientifically treat our bulbs again before shipment is made to our customers.

Inasmuch as thrip lives in the soil, as well as on the bulbs in storage, through the winter, it is imperative that our bulbs be planted on soil where Gladioli were not grown last year and not close to other Gladioli from other sources.

We guarantee our bulbs to be the largest size and well matured, which is absolutely essential for producing exhibition flowers.
